PROFESSIONAL SUMMARY

Computer Engineering graduate and Python Developer with hands-on professional experience in Python, Django, Django ORM, Node.js, React, SQL, and REST API development. Proven track record building backend and full-stack web applications, implementing CRUD operations, and integrating REST APIs. Skilled in MySQL, SQLite, and PostgreSQL database design and connectivity, API integration and testing using Postman, and front-end development using React, HTML and CSS. Seeking a Python and SQL Developer role to deliver scalable, efficient, and secure software solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Frameworks & Libraries: Django, Django ORM, Node.js, React.js

Web Technologies: HTML, CSS

Databases: MySQL, SQLite, PostgreSQL

Tools & Platforms: Git, Postman

APIs & Integration: REST API, API Integration, Database Connectivity

Concepts: Object-Oriented Programming (OOP), CRUD Operations, Authentication & Authorization

PROFESSIONAL EXPERIENCE

Python Developer — Radiaant Captive India Limited

September 2026 – Present

Pune

- Working as a full-time Python Developer, building and maintaining backend applications and modules using Python, Django, and Django ORM.
- Developing a Collection CRM application using Node.js and React, covering REST API development, database connectivity, and user-facing dashboards.
- Designing database schemas and writing optimized SQL queries and CRUD operations to support efficient data management for live projects.
- Performing end-to-end testing, debugging, and performance optimization of APIs and application workflows, collaborating with senior developers to deliver reliable solutions.

Python Developer Intern — Radiaant Captive India Limited

May 2026 – August 2026

Pune

- Developed and maintained Python/Django-based backend applications, building scalable modules using Django ORM, models, views, templates, and forms.
- Implemented REST API integrations and managed data flow between application components.
- Performed database design, querying, and CRUD operations using MySQL/SQLite to support efficient data management for live projects.
- Carried out end-to-end testing, debugging, and performance optimization of API connectivity and application workflows, collaborating with senior developers to deliver reliable solutions.

Python Developer Intern — Sanyu Infotech Pvt. Ltd

October 2025 – April 2026

Pune

- Developed Django-based backend web applications using Python, Django ORM, and MySQL.
- Implemented CRUD operations using Django ORM to efficiently manage records in the database using MySQL and SQLite.
- Worked with Django models, views, templates, and forms to build dynamic and efficient web solutions.

PROJECTS

1. Collection CRM (Node.js & React)

Technologies: Node.js, React.js, REST API, PostgreSQL, JavaScript, HTML, CSS, Postman, Git

- Developed a Collection CRM web application to manage customer accounts, outstanding dues, payment records, and collection follow-ups in one place.
- Built RESTful backend services in Node.js with full CRUD operations for customers, collections, and follow-up activities.
- Developed a responsive React front end with reusable components, dashboards, search and filter features, and data entry forms.
- Implemented authentication and role-based authorization to control access for different user roles.
- Established database connectivity and designed the schema for reliable storage and retrieval of customer and collection data.
- Performed API testing with Postman and end-to-end debugging to ensure reliable request/response handling between the React client and Node.js server.

2. Social Media Web Application (Instagram Clone)

Technologies: Python, Django, HTML, CSS, SQLite

- Developed a social media web application using the Django framework, implementing user registration, login, and logout functionality with Django's built-in authentication system.
- Built CRUD (Create, Read, Update, Delete) functionality for managing posts, integrating an image upload feature with proper media file handling.
- Designed a user profile management system with an edit profile option and implemented search functionality using Django ORM queries.
- Applied authorization logic to ensure that only the post owner can edit or delete their content.

EDUCATION

Sant Gadge Baba Amravati University
Bachelor's Degree (Computer Engineering)

2021 – 2025
Amravati

Industrial Training Institute
Computer Operator Programming Assistant

2017 – 2018
Akola

LANGUAGES

English | Marathi | Hindi
